Vaughan Axes

Vaughan Axes are manufactured under the PATENTED ELECTRIC FUSION PROCESS (Pats. 1,948,548 and 1,948,549). This consists of forging the head and blade of the axe separately, the two being joined together by the ELECTRIC FUSION PROCESS. This produces a perfect blend of the two parts, each of which is made from the particular type of steel best suited for both parts of the axe.

The head of the axe is forged from a tough steel that will withstand the most severe usage. The entire blade is forged separately from a high grade tool steel chosen for its cutting qualities and its ability to stand up under the most gruelling service. The result, after being joined together by the ELECTRIC FUSION PROCESS, is a real electric bi-metallic axe that is recognized as the strongest yet developed.

The Vaughan process of axe manufacture produces the thinnest blade for faster cutting together with an eye that is true and will stand up under the hardest service. The all tool steel blade, extending almost to the point where the eye begins, permits the axe to be ground back further, greatly increasing the life of the tool.

For faster cutting, longer life and absolute dependability, try a Vaughan Axe. Thousands of satisfied users will vouch for them.

Vaughan Spring Eye Hammers

"The Hammers With the Shock Absorbing Action"

Spring Eye Hammers are less tiring to use. The Vaughan Patented Spring Eye (Pat. 2,090,164), combined with the special fluted Spring Handle (Pat. 2,184,985 & D-108,709), absorbs the shock, cushions the blow.

The Spring Eye helps keep the handle tight by automatically taking up handle shrinkage. It also reduces the handle breakage that often occurs when the bottom edges of the adze eye cut into the handle.

Vaughan Spring Eye Hammers are perfectly balanced and perfectly made, with a special claw that will grip any size nail from brad to spike.

Vaughan Supersteel Hammers

Quality—Distinctiveness

Extra Refined Steel—Drop Forged—Tempered Faces and Claws

All Supersteel Nail Hammers have Non-Slip Claw. They will firmly grip any size nail from brad to spike. The eyes are forged smaller toward the center than at the ends, which binds the handle firmly. The sides are crowning and will not dent the wood when matching flooring or wainscoting. The V & B Supersteel is our standard quality and big seller for general use. Trade Mark Reg. U. S. Pat. Off.

Vaughan Hatchets

Professional Carpenter's Hatchet

Long crescent bevel of draw knife shape for fast and close cutting.

Special crowned blade (Pat. D-115-256), higher in center and flowing each way, preventing binding.

The patented fluted handle gives cushion action, absorbs shock.

Specially designed handle to fit your hand with bell shaped end to prevent slipping.

Sufficient weight in head for faster and easier cutting.

A perfectly balanced tool, making cutting and driving easier.

Ideal weight. It feels light in the hand but has sufficient weight for heavy work.

Finest quality, highly finished for professional use.

With a VAUGHAN 99 in a tool box, no other hatchet is needed.

Professional

Full Polished.

Finest Grade White Hickory Handle.

Vaughan Hatchets

V & B HATCHETS are DROP FORGED from bars of high grade supersteel. Subjected to special heat treatment and individually tempered, they have a cutting edge that remains keen.

V & B Hatchets are equipped with second growth hickory handles so designed to fit the hand perfectly and the swell end prevents the tool from easily slipping out of the hand.

All patterns have thin bits for rapid cutting.

Vaughan Alloy Square Punches and Chisels

Vaughan Alloy Square Punches and Chisels are forged from extra refined, beveled, square alloy steel and are carefully tempered and individually tested. The cadmium plated finish with polished heads and tapers prevents rusting. The beveled square steel keeps the tools from rolling and affords a more comfortable grip. Ideal for automotive use as well as around the house and farm.

Concrete Chisel

Black Finish—Red Tip—Hexagon Steel

V & B Concrete Chisels are designed especially for breaking through sections of concrete or street pavements. They are made of extra heavy steel and are individually tempered and tested.

Vaughan Octagon Tools

Star Drills receive severe usage and must be made right in order to give satisfactory service. V & B Star Drills are made of Octagon Alloy Steel. They are individually tempered and individually tested. Double Duty Drills are forged from Tool Steel. The long grooves allow ample clearance for the brick and cement.

V & B Alloy Star Drill

Double Duty Star Drill

No. 324-330 Wrecking Bar

Special attention is called to the Spoon-shaped Claw, designed for pulling spikes, and to the Heel on the prying end. The back of the claw is curved to readily engage the spike.

No. 12-18-24-30-36 Wrecking Bar

A new design recessed claw with longer and narrower slot for pulling nails. The back of claw is flat for ripping purposes.
